

# #MessyMoments

When they happen, think safety first.

- Read and follow product label instructions and keep products securely closed.
- If a cleaning product spills, clean it up immediately.
- Don't let your attention be diverted when cleaning products are in use.
- Don't leave cleaning buckets containing even small amounts of liquid unattended, and never allow unattended toddlers around buckets while in use.

## Every Day...

- Keep all household cleaning products out of reach and sight of children.
- Store cleaning products away from food, children and pets.
- Keep cleaning products in their original packaging, and keep labels intact for safety information.
- Wash your hands and practice good hand hygiene with little ones who will soon be headed off to school.
